## DETAILED ACTION

### *Election/Restrictions*

1). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a mounting system, classified in class 42, subclass 94.
- II. Claims 13-21, drawn to a weapon mount apparatus, classified in class 89, subclass 37.04.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because does not require first mode and second mode operating for rifle and pistol supports respectively. The subcombination has separate utility such as a rifle sighting apparatus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3641
